

Colt Resources Inc.

(An Exploration Stage Company)

Management Discussion & Analysis

Fiscal Years ended March 31, 2010 and 2009

Form 51-102 F1

The following discussion and analysis of the financial position and results of operations for Colt should be read in conjunction with the audited consolidated financial statements for the years ended March 31, 2010 and 2009, which were prepared in accordance with Canadian Generally Accepted Accounting Principles. The audited consolidated audited financial statements and notes thereto have been reviewed by the Company's Auditor.

Additional information relating to the Company is available at www.sedar.com.

FORWARD LOOKING STATEMENTS

Certain statements contained herein are "forward-looking" and are based on the opinions and estimates of management, or on opinions and estimates provided to and accepted by management. Forward-looking statements are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those expressed or implied. Readers are therefore cautioned not to place reliance on any forward-looking statement.

The Company disclaims any obligation or intention to update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

NATURE OF ACTIVITIES

Incorporated in April of 2000, Colt Resources is a junior mining Exploration Company engaged in the acquisition, exploration and, if warranted, the development of mineral property interests. The company's mining properties are located in Portugal and Canada. All of the company's properties are in exploration stages and the company only records income from interest earned from funds on deposit.

The Company's common shares are listed on the Canadian National Stock Exchange ("CNSX") under the ticker symbol "GTP". The Company is currently a reporting issuer in the Provinces of British Columbia, Alberta and Ontario.

The Company operates a wholly owned subsidiary in Portugal by the name of Eurocolt Resources Unipessoal Lda ("Eurocolt"). The President and CEO of Eurocolt is Mr. Jorge Valente, who is also a director and Chief Operating Officer of Colt.

CORPORATE HIGHLIGHTS

The fiscal year ended March 31st 2010 was marked by instability in the financial markets and mineral commodities. Although bullish at the beginning of the fiscal year, the market for Gold underwent a series of corrections during the reporting period. The financial uncertainty, which was created by global economic challenges during Fiscal 2009 lead to liquidity shortages and this affected the market for exploration stage companies. During Fiscal 2010 there were several macro-economic challenges including more recently the instability in the European Economy and the potential failure of the banking systems of some of the nations in this continent.

During the reporting period ended March 31st 2010, management adopted a new strategic approach to focus resources on the company's Tungsten and Gold properties in Portugal. The plan addressed current financial market considerations and included a conservative approach to the use of funds for exploration.

Important events for the twelve-month period ended March 31 2010

- On April 8, 2009, the company grants Directors, Officers and Consultants 976,580 incentive stock options in accordance to the 2007 Stock Option Plan approved by the board of directors.
- On April 14, 2009, Mr. Kevin Ernst joins the company's advisory board.
- On May 5, 2009, Mr. Aurelio Useche, director, accepts his appointment as Chief Financial Officer of the corporation.
- On May 21 2009 and with the objective of broadening shareholder base and investor awareness in Europe, management listed the company on the Open Market Segment of the Frankfurt Stock Exchange under the trading symbol: **P01**.
- On May 25, 2009, management retains the services of Investel, a European Relations Firm, to support the company's listing and investor awareness efforts.
- On June 1, 2009, Mr. John D. Redfern joins the company's advisory board.
- On June 18, 2009, management announces a Non-Brokered Private Placement with an offering of up to 9 million units (1 Share + ½ warrant @0.15\$) at \$0.11.
- On July 15, 2009, management announces the first closing of the June 18 Non-Brokered Private Placement with a total of 3,339,090 units and total gross proceeds of \$367,300.
- On July 23, 2009, Mr. David A Johnson joins the company's board of directors.
- On November 19, 2009, management announces the final closing of its June 18 Non-Brokered Private Placement with proceeds totalling \$632,000.
- On November 24, 2009, the company announces the grant of 2,150,000 Incentive Stock Options to Directors, Officers and Consultants in accordance to the 2007 Stock Option Plan approved by the board of directors.
- On January 15 2010 the company announced its intention to proceed with a small non-brokered private placement of 800,000 shares at a price of \$0.21 per share. The private placement was subsequently closed on January 18th 2010.
- On February 1 2010 the company announced the addition of Mr. Declan Costelloe to the company's advisory board
- On February 9 2010 the company announced its intention to proceed with a private placement consisting of 18,000,000 units at a price of 0.25\$ for a total gross proceeds of \$4,500,000
- On March 31st 2010 the company announced its intention to proceed with its first closing on its February 2010 NBPP totalling 4,000,000 units consisting of one share and half a warrant at 0.45\$. The total raised was \$1,000,000

EXPLORATION HIGHLIGHTS

The Company's diamond drilling and property evaluation / exploration programs were under the supervision of J.W. Murton, P. Eng., a qualified person as defined by National Instrument 43-101. Mr. J.W. Murton is a director of Colt and is also responsible for the technical information presented in this MD&A.

During the year ended March 31, 2009, the Company commissioned Mr. Warner Gruenwald, P. Geo of Geoquest Consulting Ltd. to prepare for the Company a technical report compliant with NI 43-101 in respect to the Penedono Exploration Concession. Mr. Warner Gruenwald is a qualified person as defined by National Instrument 43-101, and is independent of the Company. This technical report was completed on November 28, 2008 and has been filed on the Company's corporate website, www.coltresources.com.

Important events for the fiscal year ended March 31 2010

- On April 1, 2009, management undertakes a 4-month exploration program focused on the Penedono Gold and Armamar-Meda Tungsten concessions located in northern Portugal.
- On June 9, 2009, management announces significant Gold, Tungsten and Tin values from multiple zones of mineralization on its Portuguese properties
- On August 6, 2009, and based on the results in the first four months of the reporting fiscal period, management announces a diamond drilling program on potential open pit Gold targets in the Penedono concession
- On September 23, 2009, management announces the granting of the Sda Margarida do Sado concession on Portugal's Iberian Pyrite Belt. The company also announces the favourable extension on the Penedono gold concession.
- On October 15, 2009, management releases an update on its diamond drilling programs in Portugal and ongoing exploration plans
- On November 26, 2009, the company begins a focused program on its Armamar-Meda Tungsten concession consisting of four holes and approximately 325 meters.
- On January 20, 2010 the company reported on its progress on the diamond drilling program conducted on Armamar-Meda concession with positive results

PORTUGUESE PROPERTIES

1. Penedono Concession

The Penedono Concession consists of 51.231km², which represents a reduction from the original concession area as an annual requirement under Portuguese mining law. Colt has subsequently been successful in negotiating an extension of the concession for an additional 3 years and has increased the size of the concession to 102.471 km².

As at March 31, 2010 the company had invested \$1,493,078 (\$1,003,146 as at March 31, 2009) with respect to its Penedono Concession and Exploration License. This represents a total investment of \$498,931 over the reporting period.

On the Penedono Concession at the Santo Antonio vein system, a number of new discoveries have been reported covering vein clusters and sheeted vein systems near the previously reported and partially explored NE / SW trending veins 1-13. The new N/S to NNE/SSW veins are typically narrow (0.5 – 20 cm thick) and steeply dipping. Their intensity and continuity is being investigated for the potential of hosting several small open pits.

One area lying between Veins 3 and 4 and located near the NE end of Vein 3 returned the following chip samples from the poorly exposed veins. This cluster of samples was taken over an area of approximately

100 m x 200 m and extensions to this vein swarm are being investigated.

| sample # | UTM East | UTM North | type | occurrence | Description | Au g/t |
|----------|----------|-----------|------|------------|--|--------|
| 196928 | 632907 | 4541724 | chip | Outcrop | quartz with aspy (mineralized quartz vein) | 5.56 |
| 205085 | 633869 | 4541776 | chip | Outcrop | quartz+aspy and greisen vein | 27.04 |
| 205086 | 633877 | 4541774 | chip | Outcrop | quartz+aspy and greisen vein | 18.56 |
| 205087 | 633877 | 4541774 | chip | Outcrop | quartz+aspy and greisen vein | 19.68 |
| 205088 | 633899 | 4541797 | chip | Outcrop | greisen with aspy | 34.40 |
| 205089 | 633869 | 4541776 | chip | Outcrop | quartz and greisen vein with aspy (10cm) | 26.08 |
| 205090 | 633890 | 4541781 | chip | Outcrop | quartz and greisen veins with aspy | 11.00 |
| 205091 | 633914 | 4541773 | chip | Outcrop | aspy+quartz veins, 1-2cm thick | 15.68 |
| 205092 | 633925 | 4541764 | chip | Outcrop | aspy+quartz (20cm) | 8.40 |

In addition to the vein swarms associated with the Santo Antonio veins, another area - named Marofa - Castainco, was identified as having the potential for open pit targets due to its concentration of narrow high grade gold bearing veins. The Marofa - Castainco area lies approximately 1 km to the west from the Santo Antonio veins. This area hosts at least 6 known vein swarm targets represented by the following analytical results. The Marofa - Castainco area has proven to contain tungsten values that will be further assessed during the current exploration program.

| Marofa-Castainco Rock Samples | | | | | | | | | |

During the reporting period an exploration program consisting of detailed sampling, mapping, trenching and diamond drilling was started.

2. Armamar-Meda Concession

The Armamar Meda Concession consists of 436.81 km² which in turn is partially surrounded by the Moimenta-Almendra concession consisting of 566.58 km².

As at March 31, 2010, the Company has invested \$530,623 (\$207,967 for March 31, 2009) with respect to its Armamar Meda Concession and Exploration License. This represents a total investment of \$322,656 over the reporting period.

On the Armamar Meda Concession, the company has completed detailed sampling and evaluation of several tungsten (W) and tungsten / tin (W / Sn) prospects and showings with very encouraging results. The two main areas reported on are the **TABUAÇO** area and the **BEBEZES** area.

The **TABUAÇO AREA** hosts the main (1) San Pedro das Aguias occurrence and has also been shown to host new additional important W occurrences. These new occurrences have been labeled (2) Aveleira zone and (3) Quinta-Tavora zone.

(1) The San Pedro das Aguias occurrence has had 6 widely spaced diamond drill holes completed on the mineralized skarn horizon. These holes indicated a relatively shallow dipping zone with varying thicknesses of up to 19 metres grading approximately 1 % WO₃. A very preliminary resource calculation completed by earlier operators and which is not NI 43-101 compliant and which has not been confirmed by Colt, indicated 1,000,000 tonnes with an approximate grade of 0.9% WO₃. The mineralization indicated in the 6 diamond drill holes appeared to be open to depth and along strike.

A detailed sampling and mapping program over the complete San Pedro das Aguias area as well as its lateral extensions plus a newly discovered parallel zone lying some 60 m below the "main" zone, resulted in the collection of 88 rock samples. This data indicates that the "main" San Pedro das Aguias target now

has a potential strike length of greater than 500 m, with a thickness of 10 – 20 m and with a potential grade on surface, as indicated in the following table, of 0.673% WO₃. The expanded strike potential for the “main” skarn zone with an as yet to be determined depth potential to the underlying granite contact allows a conceptual doubling or trebling of tonnage from the earlier estimate. This tonnage indication is not NI 43-101 compliant but is shown as a potential resource that may be developed.

Total channel sample results from São Pedro das Águias (main zone)

| sample # | X_UTM | Y_UTM | Occurrence | sample type | true width (m) | WO ₃ % |
|---|--------|---------|------------|-------------|----------------|-------------------|
| S.P.Águias main skarn horizon | | | | | | |
| ave.6 samples (#205051-205056) | 624772 | 4549460 | Outcrop | channel | 23.30 | 0.454 |
| 205057 | 624795 | 4549428 | Outcrop | channel | 3.20 | 0.158 |
| 205058 | 624820 | 4549385 | Outcrop | channel | 2.85 | 0.300 |

| 205181 | 624740 | 4549544 | Outcrop | channel | 1.50 | 0.762 |
| 205182 | 624856 | 4549395 | Outcrop | channel | 3.50 | 1.680 |
| weighed average grade of 23 channel samples | | | | | | 0.673 |

The second parallel target is poorly exposed with a resulting lesser sample frequency, but has important tungsten values (average 0.298% WO₃) with an as yet to be determined strike length and width. A total of 7 samples were collected from this zone.

Total channel, chip & grab sample results from the San Pedro das Águias lower skarn horizons

| sample # | X_UTM | Y_UTM | Occurrence | sample type | true width (m) | WO ₃ % |
|---------------------------------|--------|---------|-------------|---------------|----------------|-------------------|
| S.P.Águias lower skarn horizons | | | | | | |

| 7 samples | | | | average grade | | 0.298 |

(2) The Aveleira zone is located immediately to the north and on strike with the San Pedro das Aguias area and may represent a continuation of the permissive skarn stratigraphy an additional 950 m to the north, effectively connecting the southern most San Pedro das Aguias area with the more northern Quinta Tavora area.

Outcrop is poorly exposed due to deep weathering and thick soil cover but at least 2 skarn horizons were located and sampled. No overall widths of mineralized skarn horizons were observed due to the cover.

A total of 9 samples were collected with the results as follows.

Total chip and grab sample results from Quinta da Aveleira zone

| sample # | X_UTM | Y_UTM | Occurrence | sample type | true width (m) | WO3 % |
|--|--------|---------|-------------|-------------|----------------|-------|
| Aveleira NW | | | | | | |
| 205153 | 624327 | 4550258 | outcrop | Chip | ? | 0.740 |
| 205154 | 624368 | 4550214 | outcrop | Chip | ? | 0.884 |

| average grade | | | | | | 1.142 |

(3) The Quinta – Tavora zone lies to the north of the Aveleira area and may represent a continuation of that mineralization to the north. Once again, outcrop was scarce and the true width of skarn beds could not be determined. At least 3 separate zones of skarn were sampled (a total of 23 samples) with the results as follows.

Total channel, chip & grab sample results from the Quintã – Távora Zone

An assessment of all the tungsten results from the Tabuaço area indicates a positive potential for the development of several possible open pit and/or underground bulk mining zones. A significant amount of diamond drilling is required to define these areas of mineralization, but the potential is there.

The **BEBEZES AREA** area is located on the southern boundary of the Armamar Meda Concession, north east of the Santo Antonio vein system which lies 3 km to the south west. This mineralized area, (unlike the Santo Antonio veins), carries little to no gold with the arsenopyrite content but contains significant W and Sn values.

The mineralized quartz veins are hosted in granite, are steeply dipping and have widths varying up to > 2 m. A secondary system of narrow veins is evident in close proximity to some of the main veins, which when combined with the main veins may have potential for an open pit resource.

Nearly all the sampled locations are from within and from the dumps of old diggings, dating from likely World War 2 when tungsten was in high demand. One factor must be kept in mind when considering the tungsten values as reported in assay. All dump samples were taken from hand sorted material that was left over after most if not all of the visible wolframite (tungsten) mineralization had been removed, hence tungsten values could be significantly underreported. As well, samples from vein remnants on the walls of old diggings would have been left behind by the original miners as likely to be "barren".

| Sample # | UTME | UTM W | occurrence | type | Description | WO3 % | Sn % |

The Bebezés veins remain open in all directions from the locations sampled and more sampling and mapping is required to gain a full understanding of this large mineralized vein swarm.

3. Moimenta-Almendra Concession

The exploration license for the Moimenta Almendra Property in Portugal was approved by the Portuguese Government on July 1, 2008 and as a result, the formal signing of the contract between the Government of Portugal and the Company took place on October 1, 2008. The Company entered into a prospecting and exploration license agreement with the Government of Portugal whereby Colt has been granted the exclusive right to prospect and explore for base and precious metals on the MOIMENTA-ALMENDRA Property which has a surface area of approximately 566 sq. km. and which is partially contiguous to the Company's Penedono and Armamar-Meda Exploration Concessions (the "MOIMENTA-ALMENDRA EXPLORATION LICENSE").

The initial term of the MOIMENTA-ALMENDRA EXPLORATION LICENSE is for three years ending January 10, 2011 (the "Initial Term"), which can be extended twice on an annual basis (the "Extended Term"). During the Initial Term, Colt is obligated to incur prospecting and exploration expenditures of not less than 25,000 € by January 10, 2009 (incurred), 50,000 € by January 10, 2010 and, 75,000 € by January 10, 2011. During the Extended Term, Colt is obligated to incur exploration expenditures on an annual basis of not less than 100,000 €. During the Initial and Extended Terms, Colt shall be required to relinquish 50% of the area covered by the MOIMENTA-ALMENDRA EXPLORATION LICENSE.

In respect to the MOIMENTA-ALMENDRA EXPLORATION LICENSE, Colt has lodged a bank guarantee, as a performance bond, for the amount of 10,000 € in favor of the Government of Portugal.

As at March 31, 2010, the Company has invested \$141,263 (\$52,942 for March 31, 2009). This represents a total investment of \$88,321 over the reporting period.

During the Initial and Extended Terms, Colt is obligated to pay to the Government of Portugal an annual fee in the amount of 25 € per sq. km of ground covered by the MOIMENTA-ALMENDRA EXPLORATION LICENSE. The License fee for the first year in the amount of €14,344.07 was paid during the year ended March 31, 2009.

Upon the completion of the Initial and Extended Terms, Colt may apply for an Exploitation License, which, if granted, shall have a term of 30 years and which may be extended by Portuguese Government approval for a period not to exceed 20 years (the "Exploitation License"). Upon the granting of the Exploitation License, and in the event that mining activities are to take place, then Colt shall be obligated, at Colt's sole discretion, either to pay 10% of the net income, exclusive of all taxes, derived from its mining activities or, alternatively, pay Net Smelter Returns Royalty ("NSR") on production at NSR rates ranging from 1% to 4% depending on the price of gold (the "Exploitation License Fees"). However, during the first 2 years of mining activities, the Government of Portugal shall fully waive the payment of the Exploitation License Fees. Additionally, as soon as the Exploitation License is granted to Colt, and provided that production from the mining activities is determined to exceed 1,000,000 ounces of gold or of gold equivalent during the life of the mining activities, then Colt will be obligated to pay 100,000 € as a commercial discovery bonus to the Government of Portugal.

4. Santa Margarida do Sado Concession

The Company was officially informed that the Company's application for an exploration license for the Santa Margarida do Sado Concession in Portugal was approved by the Portuguese Government on November 11, 2008 and that the formal signing of the contract between the Government of Portugal and the Company is expected to take place shortly. A bank guarantee in the amount of 10,000 € has been lodged by the Company in favor of the Government of Portugal in support of the Company's application for an exploration license for the Santa Margarida do Sado Concession.

On September 23, 2009, the company announced the granting of the Santa Margarida do Sado concession consisting of 360.46 km² of prospective ground situated on the western extension of the Iberian Pyrite Belt, where the favourable basement geology is concealed under Tertiary cover sediments of the Lower Sado Basin. The IPB extends for more than 250 km from southern Spain through southern Portugal and is the host for numerous volcanogenic massive sulphide deposits in both countries, including several giant deposits with (greater than) 100 Mt total geologic resources, such as Rio Tinto and Tharsis in Spain, and Aljustrel and Neves-Corvo in Portugal.

The Santa Margarida do Sado concession is located in southern Portugal, 70 km to the south east of Lisbon and extends from near the Atlantic coast south-eastward for approximately 45 km. Situated near the center of the concession is the town of Grandola.

As at March 31, 2010, the Company has invested \$33,317 (\$0 for March 31, 2009) with respect to its Santa Margarida do Sado Concession and Exploration License. This represents a total of \$20,217 in taxes paid to the Portuguese government for the granting of the concession and \$13,100 in exploration efforts over the reporting period.

Adjacent ground surrounding Colt's concession is currently held by Redcorp Ventures Ltd. and Metallica Mining AS. Previous neighbouring companies included Lundin Mining Corp and Iberian Resources Ltd.

Three known VMS deposits are located in the immediate area of Colt's new concession: Lousal, Caveira and Lagoa Salgada. The Lousal mine (approximately 8 km to the south) was active until 1988 and produced a reported historical resource of around 6 Mt averaging 0.7% Cu, 0.8% Pb, 1.4% Zn, 1 g/t Au and 20 g/t Ag. Caveira (approximately 2 km to the south) is a smaller deposit whose surface gossan cap was exploited in Roman times for gold and silver; while its deep seated massive sulphides were exploited during the 20th century.

Approximately 6 km to the north east, is the Lagoa Salgada deposit, equally concealed under the Tertiary cover sediments of the Lower Sado Basin, and which was discovered in 1992 by the Portuguese Geological Survey IGM, based on drill testing a gravity anomaly. Currently being explored by Redcorp, this deposit has a reported drill indicated and inferred resource in the order of 4 Mt averaging 0.35% Cu, 4.63% Pb, 5.08% Zn, 1.24 g/t Au and 80 g/t Ag.

Respectively at 35 km and 75 km to the south east of Colt's concession are located the giant Aljustrel and Neves-Corvo VMS deposits, both in operation and each one comprising at least 5 massive sulphide lenses summing up to nearly 200 Mt of total original geologic resources. Neves-Corvo was first discovered in 1977, through drill testing of a major gravity anomaly. At one of the lenses of Aljustrel there was copper mining by the Romans from its upper enrichment zone; while other sulphide lenses were discovered between 1956 and 1970, which were found based again on testing gravity anomalies.

The area now granted to COLT at Santa Margarida do Sado was not explored for its possible underlying VMS deposits until 1990, when the Portuguese Geological Survey IGM first carried out ground geophysical surveys there. Subsequent explorers included Rio Tinto Plc, and more recently Redcorp Ventures Ltd, but both of these companies concentrated around the Lagoa Salgada discovery.

As a result of these past exploration programs, the Santa Margarida do Sado concession has a good exploration data base, comprising mainly aeromagnetic survey, ground gravity survey, some sparse geophysical surveys by other methods, and some scout drill holes. It is believed that the data compilation and assessment of this data base should reveal ready to drill targets.

The concession period is for an immediate term of 4 years with a 50% area reduction at the end of the 2nd and 3rd year. The required minimum investment for the 1st year is 100,000 Euros, 2nd year 300,000 Euros and 3rd and 4th year each 500,000 Euros.

CANADIAN PROPERTIES

1. Extra High Property, British Columbia

On January 21, 2008, the Company entered into an second Option Agreement (the "2008 Option Agreement") with Kokomo whereby Colt was granted the right and option to acquire, in two separate equal tranches, Kokomo's 66% undivided interest in the Extra High Property (the "Property"). Pursuant to the 2008 Option Agreement, Colt has exercised the first tranche of the option by making a cash payment of \$250,000 to Kokomo and has acquired from Kokomo a 33% undivided interest in the Property. As a result of exercising the first tranche of the option, Colt now holds a 67% undivided interest in the Property and has become the operator of the Property. Furthermore, pursuant to the 2008 Option Agreement, Colt will be solely responsible for all exploration and Property expenditures in respect of the Property which are initiated and incurred by Colt from January 31, 2008 to December 31, 2008.

In order to exercise the second tranche of the option, Colt must make a cash payment of \$250,000 to Kokomo on or before December 31, 2008. And upon Colt making such payment, then Colt will be deemed to have exercised the second tranche of the option and to have acquired from Kokomo the remaining 33% undivided interest in the Property, subject only to an existing 1.5% NSR Royalty payable to an arm's length party (the "Arm's Length Royalty") and to a 0.5% NSR Royalty payable to Kokomo (the "Kokomo Royalty"). Colt will have the option to purchase the Kokomo Royalty for the sum of \$500,000 and Colt will also have the option to purchase 50% or 0.75% of the Arm's Length Royalty for the sum of \$500,000.

As of December 31, 2008, the Company did not exercise the second tranche of the option, as a result of which, the 2008 Option Agreement has terminated. Colt and Kokomo shall operate as Joint Venture partners with Colt holding an initial 67% undivided interest in the Property and Kokomo holding an initial 33% undivided interest in the Property. Henceforth, each party shall contribute its proportionate share of the Property expenditures. Should any party's interest be diluted to less than a 10% undivided interest in the Property, then its interest will forever be converted to a 0.5% NSR Royalty.

As at March 31, 2010, the Company has invested \$533,110 (\$532,494 for March 31, 2009) with respect to its Extra High Concession and Exploration License. There was no material investment in this concession over the reporting period.

2. Uranium Property, Quebec

The Company entered into a Property Option Agreement with Diagnos Inc. on the 5th day of October, 2007, as further amended by letter agreements dated November 28, 2007 and September 5, 2008, whereby Diagnos has agreed, under certain terms and conditions, to grant the Company the sole and exclusive option to purchase 100% undivided right, title and interest, subject only to a 2% NSR Royalty, in two uranium exploration prospects which are located in the Province of Quebec. The Company exercised the option and on February 8, 2008 paid Diagnos \$90,000 plus G.S.T. The Company is obligated to drill at least three exploration holes of not less than 100 ft per hole on each prospect by June 30, 2009. Furthermore, in the event that a favourable feasibility study is completed in respect to each property, then the Company is obligated to issue a number of fully issued and non assessable common shares of the Company, which shall be calculated by dividing \$70,000 by the average closing price of the shares of the Company for the 30 days after the completion date of such favourable feasibility study. Additionally, the Company has the right to reduce the 2% NSR Royalty to 1% NSR Royalty by making a cash payment of \$1,000,000 to Diagnos.

During the year ended March 31, 2009, the Company decided not to pursue to Uranium properties option and as such wrote-off \$90,000 in acquisition costs to operations.

3. Gaspésie Mineral Property, Quebec

On December 15, 2008 the Company entered into an Agreement with Diagnos Inc. ("Diagnos") to acquire a 100% interest in four mineral properties located in the Gaspésie Region of the Province of Quebec, namely, the Restigouche, West l'Alverne, Gaspésie-1 and Gaspésie-4 properties. These four properties comprising 267 claims, cover an area of approximately 153 km², and are located in the south-western part of the Gaspésie region, close to St-André-de-Restigouche. The terms of the proposed acquisition include a payment of \$62,500 in cash and the issuance of 750,000 restricted common shares in the capital of the Company at a price of \$0.25 per share, on or before March 27, 2009.

During the year ended March 31, 2009, the Company issued 750,000 common shares to Diagnos valued at their quoted market value on the date of issue of \$90,000 or \$0.12 per common share which resulted in a recovery of mineral property acquisition and exploration costs of \$97,500.

The Gaspésie Agreement was amended by letter dated March 26, 2009, whereby the due date of the payment of \$62,500 in cash was extended to May 15, 2009 and further amended by letter dated May 15, 2009 whereby Diagnos would accept settlement of the payment for common shares of the Company at a deemed value of \$0.15 per share for 416,667 common shares and \$27,662 in cash.

Additionally, Diagnos will retain a 2% Net Smelter Return (NSR) royalty on each property and Colt will have the option to buy back 1% of the NSR for \$1,000,000 at any time within the first five years of an economic discovery. Colt is required to spend a minimum of \$450,000 on exploration and drilling by December 15, 2010.

As at March 31, 2010, the Company has invested \$135,999 (\$140,116 for March 31, 2009) with respect to its Gaspésie Concession and Exploration License. There was no material investment in this concession over the reporting period.

RESULTS FROM OPERATIONS

Fiscal year ended March 31, 2010

For the reporting period ended March 31, 2010, the company reported a loss before other items and income taxes of \$1,261,244, a 28% increase over the previous year (\$985,437). The increase in the company's net and comprehensive loss was due primarily to the net increase in consulting, legal and investor relations and promotional expenses.

The company reported a total weighted average number of commons shares outstanding of 23,717,819. As a result Colt Resources reported a net and comprehensive loss per share of \$0.05 in fiscal 2010 as compared to \$0.07

LIQUIDITY AND CAPITAL RESOURCES

As of March 31, 2010, total assets were \$3,542,806 compared to \$2,171,774 for the previous year. Mining interests increased by \$934,841 from \$1,932,549 to \$2,867,390. The increase represents the capitalization of all expenditures arising from mineral property exploration and development in Portugal.

During the year, Cash and Cash Equivalents increased from \$19,818 (March 31, 2009) to \$484,445 (March 31, 2010). This is the result of the successful closing of three private placements during the fiscal year.

For the year ended March 31, 2010, the company recorded its obligations under the 2007 convertible debenture issuance as a current liability. The convertible debenture matures on June 29, 2010. As a result of the combination of successful capital raises and the recoding of the convertible debenture as current liabilities, the company's working capital deficit decreased from (\$263,959) in fiscal 2009 to (\$189,358) in fiscal 2010.

In the past, the company was successful in financing its liquidity requirements through the issuance of equity and debt securities. At the end of fiscal 2010 the company reported that the February 2010 Private Placement remained open and outstanding. Management believes the company has sufficient liquidity to meet its operating obligations for the next 6 months. As the company is currently incurring operating losses, additional capital will be required to continue exploration activities on the properties.

Statement of changes in financial position as at March 31, 2010,

Operating Activities

Cash flow used in operating activities amounted to \$559,973 in 2010 as compared to \$619,465 in 2009. The decrease was primarily the result of increases in accounts payables and accrued liabilities and non-cash stock based compensation issued during the year.

Financing Activities

Cash provided by financing activities amounted to \$1,979,676 in 2010 as compared to \$596,700 in 2009. The amount provided by financing activities is primarily the result of equity raised for cash through several private placements during the year.

Investing Activities

Cash used in Investing Activities amounted to \$953,850 in 2010 as compared to \$586,580 in 2009. The increase is primarily the result of higher levels in capitalized mining expenditures on the company's Portuguese properties.

At the end of the reporting period the company held approximately \$484,445 in cash as compared to \$19,818 in the previous reporting period.

Fourth Quarter Results

For the fourth quarter ended March 31, 2010, the Company reported a loss before other items and income taxes of \$464,829 as compared to \$124,023 in the same period last year. The prior period's expenses included significant non-cash charges relating to the recording of director's compensation and the convertible debenture. The increase was primarily due to higher than usual legal, consulting and investor relations costs arising from multiple private placements, listing costs for Canadian and US stock exchanges and supporting IR initiatives.

Summary of Quarterly Results

Fiscal Year ended March 31, 2010

| For the Quarterly Periods ended: | March 31, 2010 Q4 (\$) | December 31, 2009 Q3 (\$) | September 30, 2009 Q2 (\$) | June 30, 2009 Q1 (\$) |
|--|-------------------------------|----------------------------------|-----------------------------------|------------------------------|
| Total Revenues | 0 | 0 | 0 | 0 |
| Loss before other Items | (464,829) | (316,311) | (172,540) | (286,769) |
| Loss per common share before other items | (0.02) | (0.015) | (0.02) | (0.02) |
| Net loss for the period | (486,326) | (316,209) | (172,134) | (286,575) |
| Basic net loss per common share | (0.02) | (0.015) | (0.01) | (0.02) |

Fiscal Year ended March 31, 2009

| For the Quarterly Periods ended: | March 31, 2009 Q4 (\$) | December 31, 2008 Q3 (\$) | September 30, 2008 Q2 (\$) | June 30, 2008 Q1 (\$) |

Convertible Debenture

In June 29 2007 the company closed a non-brokered Private Placement that resulted in the issuance of Convertible Debentures for the total consideration of \$1,465,000. At March 31, 2010 the convertible debentures had a carrying value of \$271,038 (2009 - \$287,917) including accrued interest. The debentures are due June 28, 2010, bear interest at 10% per annum compounded monthly and are payable at maturity. The debt is convertible into units, each unit consisting of one common share and one share purchase warrant. If converted before June 29, 2010, the conversion price will be \$0.35 per unit. Each warrant is exercisable to purchase one common share at prior to June 29, 2010 (the expiry date).

The convertible debentures were subsequently paid at maturity in shares in accordance to the terms in the debenture agreement.

At March 31, 2010

| | Mar 31, 2010 | March 31, 2009 |
|--|-------------------|-------------------|
| Convertible debenture, beginning balance | \$ 287,917 | \$ 692,440 |
| Interest | 111,401 | 152,780 |
| Conversion of debenture | (128,280) | (557,303) |
| Convertible debenture, balance | \$ 271,038 | \$ 287,917 |
| Equity portion of convertible debenture, beginning balance | \$ 214,097 | \$ 807,860 |
| Equity allocation of conversion | (85,639) | (593,763) |
| Equity portion of convertible debenture, balance | \$ 128,458 | \$ 214,097 |

Non-Brokered Private Placement Financings

Pursuant to the private placement announced on June 18th, 2009 whereby the Company would proceed with a non-brokered private placement consisting of up to 9,000,000 Units at a price of \$0.11 per unit to raise gross proceeds of up to \$990,000, the Company closed on July 15th, 2009, the First tranche of this private placement financing and issued 4,020,908 shares at 0.11\$ and 2,010,454 warrants convertible at 0.15\$ for a gross proceeds of \$442,300. On November 13th the company announced the third and final closing of this private placement financing and issued 4,979,000 shares at 0.11\$ and 2,489,500 warrants convertible at 0.15\$ for a gross proceeds of \$ 547,690.

On January 15th 2010 the company announced a Private Placement for a total of 800,000 shares at a price of \$0.22 per share. The private placement was closed on January 18th 2010 with proceeds totalling \$168,000.

On February 9th 2010 the company announced a Private Placement for a total of 18,000,000 units at a price of \$0.25 per shares to raise gross proceeds of up to \$4,500,000. Each unit consisted of one restricted common share and half a warrant at \$0.45 expiring February 26th 2012.

COLT RESOURCES INC.
Management's Discussion & Analysis
Fiscal Year Ended March 31, 2010

On March 31st 2010 the company announced a first closing with gross proceeds of \$1,000,000 (4,000,000 units). On May 25th 2010 the company announced a second closing with gross proceeds of \$1,100,000 (4,400,000).

The following table summarizes the changes in the share capital of the Company for the reporting period

| | Number of Shares | Capital Stock | Equity Portion Convertible Debt | Contributed Surplus | Deficit | Shareholders' Equity |
|---|---------------------|--------------------|--|------------------------|-----------------------|-------------------------|
| Balance – March 31, 2008 , as restated | 10,028,056 | \$1,573,182 | \$807,860 | \$393,183 | (\$1,495,889) | \$1,278,336 |
| Common shares issued for cash (note 10(b)) | 1,739,000 | \$434,750 | | | | \$434,750 |
| Flow-through shares issued for cash (note 10(b)) | 711,000 | \$177,750 | | | | \$177,750 |
| Common shares converted from convertible debt (note 9) | 4,571,040 | \$1,151,066 | (\$593,763) | | | \$557,303 |
| Common shares issued for mineral property interest (note 10(c)) | 750,000 | \$90,000 | | | | \$90,000 |
| Stock-based compensation / Finder Warrants (note 10(g)) | | (\$4,588) | | \$41,238 | | \$36,650 |

Stock Options granted

The Company has a stock option plan under which officers, directors, employees and consultants are eligible to receive stock options. The total number of common shares reserved under option for issuance may not exceed 20% of the common shares outstanding.

The following table summarizes the stock option activity during the fiscal year ended March 31, 2010 and 2009

| | Number of Options | Weighted Average Exercise Price | Weighted Average Remaining Contractual Life in Years |
|-------------------------|-------------------|---------------------------------|--|
| Balance, March 31, 2008 | 2,005,611 | \$ 0.25 | 4.74 |
| Options granted | 600,000 | \$ 0.25 | |
| Options forfeited | (829,031) | \$ 0.25 | |
| Balance, March 31, 2009 | 1,776,580 | \$ 0.25 | 2.78 |
| Options granted | 3,526,580 | \$ 0.25 | |
| Options forfeited | (1,003,160) | \$ 0.25 | |
| Options Exercised | (150,000) | | |
| Balance, March 31, 2010 | 4,150,000 | \$ 0.25 | 2.98 |

The following stock options are outstanding and exercisable at the fiscal year ended March 31, 2010 and 2009

| Expiry Date | Exercise Price | Number of Options | |
|---|----------------|-------------------|----------------|
| | | March 31, 2010 | March 31, 2009 |
| June 30, 2009 | \$0.25 | | 500,000 |
| March 19, 2011 | \$0.25 | 100,000 | 100,000 |
| February 22, 2012 | \$0.25 | | 53,160 |
| March 19, 2013 | \$0.25 | 850,000 | 1,123,420 |
| April 8, 2014 | \$0.25 | 750,000 | 0 |
| May 25, 2011 | \$0.25 | 200,000 | 0 |
| May 28, 2014 | \$0.25 | 100,000 | 0 |
| November 23, 2014 | \$0.25 | 2,150,000 | 0 |
| Total stock options outstanding and exercisable | | 4,150,000 | 1,776,580 |

If any stock options are exercised, then all funds received by the Company shall be used for general working capital purposes. However, there are no assurances whatsoever that any stock options will be exercised prior to their respective expiry dates.

Warrants Issued

The following summarizes the warrant activity during the fiscal year ended March 31, 2010 and 2009:

| | Number of Warrants | Weighted Average Exercise Price | Weighted Average Remaining Contractual Life in Years |
|------------------------------|--------------------|---------------------------------|--|
| Balance, March 31, 2008 | 4,429,850 | \$ 0.30 | 2.59 |
| Warrants expired | (310,720) | \$ 0.25 | |
| Warrants issued | 7,084,240 | \$ 0.30 | |
| Balance, March 31, 2009 | 11,203,370 | \$ 0.30 | 1.62 |
| Warrants expired / Exercised | (1,007,744) | \$ 0.29 | |
| Warrants issued | 6,834,074 | \$ 0.24 | |
| Balance, March 31, 2010 | 17,029,700 | \$ 0.29 | 1.20 |

At March 31, 2010 and 2009 the following warrants are outstanding. Each warrant entitles the holder to purchase one common share at the exercise price per common share with the following expiry dates:

| Expiry Date | Exercise Price | Number of Warrants | |
|---|----------------|--------------------|-------------------|
| | | 2010 | 2009 |
| December 30, 2008 | \$0.25 | - | - |
| September 28, 2009 | \$0.25 | - | 48,640 |
| September 29, 2009 | \$0.30 | - | 608,000 |
| November 27, 2009 | \$0.25 | - | 4,960 |
| November 27, 2009 | \$0.35 | - | 62,000 |
| December 30, 2009 | \$0.25 | - | 9,600 |
| December 30, 2009 | \$0.35 | - | 120,000 |
| December 30, 2010 | \$0.30 | 3,908,000 | 3,908,000 |
| June 29, 2010 | \$0.30/\$0.35 | - | 4,782,170 |
| June 29, 2011 | \$0.30 | 609,121 | - |
| June 29, 2011 | \$0.35 | 4,782,170 | - |
| June 30, 2011 | \$0.15 | 4,345,409 | - |
| July 30, 2011 | \$0.30 | 1,360,000 | 900,000 |
| November 30, 2011 | \$0.30 | - | 460,000 |
| February 25, 2012 | \$0.45 | 1,590,000 | - |
| March 3, 2012 | \$0.30 | 300,000 | 300,000 |
| March 23, 2012 | \$0.45 | 135,000 | - |
| Total warrants outstanding and exercisable | | 17,029,700 | 11,203,370 |

RELATED PARTY TRANSACTIONS

- (a) A director and the Chief Operating Officer of the Company who is also President and Chief Executive Officer of Eurocolt, the Company's wholly-owned Portuguese subsidiary, received a monthly fee of \$7,500 until January 31 2010. On February 1st 2010 the related party stepped down from the Board of Directors and as COO and continues as President and CEO of Eurocolt. At March 31, 2010, \$10,913 was owed to the related party from his former role and \$13,737 (€10,000) from his continued role in Eurocolt.
- (b) A director of the Company charges the Company a fee of \$500 per day for geological consulting whenever his services are required. At March 31, 2010, \$8,466 was owed to the related party.
- (c) A director and Chief Executive Officer ("CEO") of the Company charges the Company a fee of \$10,000 per month for professional fees. At March 31, 2010, \$11,287 was owed to the related party.
- (d) A director and Chief Financial Officer ("CFO") of the Company charged the Company \$7,500 per month as professional fees pursuant to his contract with the Company. At March 31, 2010, \$0 was owed to the related party. On May 2010 the contract was renewed with a monthly fee of \$10,000.
- (e) A director and Corporate Secretary of the company charged the company on an hourly rate of \$250 for professional fees. At March 31, 2010 \$4,396 was owed to the related party.
- (f) During the three months ended September 30, 2009, the Company entered into a loan agreement for a loan of \$75,000 from individuals related to the CEO bearing interest at 10% per annum if paid in full by November 19, 2009, otherwise bearing interest at 12% per annum due January 19, 2010 see note 12 (a). The loan was not repaid by the due date and the interest rate was modified accordingly. Subsequently, In January of 2010 the loan was renewed for another term of 6 months under the same conditions as before. On March 25 2010 the loan was repaid in full, totalling \$82,531 including accrued interest.

RISK MANAGEMENT AND GOING CONCERN

The MD&A and the company's financial statements have been prepared using Canadian Generally Accepted Accounting Principles (GAAP) as applicable to going concerns. However, certain facts and circumstances may cause a significant doubt on the reasonableness of this assumption. The company is currently pursuing financing alternatives to fund its operations and to continue as a going concern. Although there are no assurances that the company will be successful in these actions, management is confident that it will be able to secure the necessary funding.

There is significant doubt, at the end of this fiscal period, of the company's ability to meet its commitments and ongoing exploration activities. There is no guarantee that measures pursued by management will be successful.

This MD&A and the corresponding financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the Balance sheet classifications that would be necessary if the going concern assumption was inappropriate. These adjustments could be material.

The Company, and the Securities of the Company, should be considered a highly speculative investment. The following risk factors should be given special consideration when evaluating an investment in any of the Company's Securities:

There are a number of outstanding securities and agreements pursuant to which common shares of the Company may be issued in the future. This will result in further dilution to the Company's shareholders.

The Company has a very limited history of operations, is in the early stage of development and has received no revenues other than insignificant interest revenues. As such, the Company is subject to many risks common to such enterprises. There can be no assurance that the Company will be able to obtain adequate financing in the future or, if available, that the terms of such financing will be favourable. The Company has no intentions of paying any dividends in the future.

Although the Company has taken steps to verify the title to mineral properties in which it has acquired an interest, no assurance whatsoever can be given that the Company's interests may not be challenged by third parties. If challenged, and if the challenge is sustained, it will have an adverse effect on the business of the Company. Title to mineral properties may be subject to unregistered prior agreements or transfers, and may also be affected by undetected defects or the rights of indigenous peoples.

Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the mineral properties, the potential for production on the properties may be diminished or negated.

The exploration of mineral properties involves significant risks which even experience, knowledge and careful evaluation may not be able to avoid. The price of metals has fluctuated widely, particularly in recent years as it is affected by numerous factors which are beyond the Company's control including international economic and political trends, expectations of inflation or deflation, currency exchange fluctuations, interest rate fluctuations, global or regional consumptive patterns, speculative activities and increased production due to new extraction methods. The effect of these factors on the price of metals, and therefore the economic viability of the Company's interests in the mineral properties cannot be accurately predicted. Furthermore, changing conditions in the financial markets, and Canadian Income Tax legislation may have a direct impact on the Company's ability to raise funds for exploration expenditures. A drop in the availability of equity financings will likely impede spending. As a result of all these significant risks, it is quite possible that the Company may lose its investments in the Company's mineral property interests.

CHANGES IN SIGNIFICANT ACCOUNTING POLICIES

The Company's consolidated financial statements have been presented in accordance with Canadian GAAP on the basis that the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business.

A. Financial Instrument disclosures

Effective April 1, 2008 the Company adopted, CICA Handbook Section 3862, "Financial Instruments – Disclosures" and Section 3863, "Financial Instruments – Presentation", which together comprise a complete set of disclosure requirements for financial instruments. Section 3862 requires disclosure of additional detail by financial instruments; Section 3863 requires disclosure of additional detail by financial asset and liability categories. Section 3863 establishes standards for presentation of financial

instruments and non-financial derivatives. It deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset. As a result of the adoption of these standards, additional disclosures on the risks of certain financial instruments have been included in note 5.

B. Credit Risk and the Fair Value of Financial Assets and Financial Liabilities

In January 2009, the Emerging Issues Committee (the "EIC") of the CICA issued EIC-173, "Credit Risk and the Fair Value of Financial Assets and Financial Liabilities", which clarifies that an entity's own credit risk and the credit risk of the counterparty should be taken into account in determining the fair value of financial assets and liabilities, including derivative instruments. EIC-173 is to be applied retrospectively without restatement of prior periods in interim and annual financial statements for periods ending on or after the date of issuance of EIC-173. On the date of adoption, the Company re-measured its financial assets and liabilities as appropriate and there was no impact on the consolidated financial statements arising from the adoption of EIC-173. In accordance with EIC-173, prior period consolidated financial statements have not been restated.

C. Mining Exploration Costs

In March 2009, the EIC issued EIC-174, "Mining Exploration Costs", which provides guidance on capitalization of exploration costs related to mining properties. It also provides guidance for development and exploration stage entities that cannot estimate future cash flows from its properties in assessing whether impairment in such properties is required. EIC-174 also provides additional discussion on recognition of long-lived assets. EIC-174 is to be applied in interim and annual financial statements for periods ending on or after the date of issuance of EIC-174. The adoption of this section did not have a significant impact on the Company's consolidated financial statements.

D. Business combinations

In January 2009, the CICA issued Section 1582, "Business Combinations", Section 1601, "Consolidations", and Section 1602, "Non-Controlling Interests". These sections replace former CICA Section 1581, "Business Combinations" and Section 1600, "Consolidated Financial Statements", and establish a new section for accounting for a non-controlling interest in a subsidiary.

Sections 1582 and 1602 will require net assets, non-controlling interests and goodwill acquired in a business combination to be recorded at fair value and non-controlling interests will be reported as a component of equity. In addition, the definition of a business is expanded and is described as an integrated set of business activities and assets that are capable of being managed to provide a return to investors or economic benefits to owners. Acquisition costs are not part of the consideration and are to be expensed when incurred. Section 1601 establishes standards for the preparation of consolidated financial statements.

These new sections apply to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption of these sections is permitted as of the beginning of a fiscal year. All three sections must be adopted concurrently. The Company is currently evaluating the impact of the adoption of these sections.

E. International Financial Reporting Standards ("IFRS")

In February 2008, the CICA Canadian Accounting Standards Board confirmed the changeover to IFRS from Canadian GAAP will be required for Canadian publicly-listed companies effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011.

The Company will adopt IFRS commencing for interim and fiscal period reporting commencing April 1, 2011. The IFRS standards will require the restatement of comparative financial statements of the Company for the interim periods and for the year ended March 31, 2011 and earlier where applicable. While the Company has begun developing its IFRS conversion plan, it cannot reasonably disclose the impact on its financial reporting at this time but will be discussing the plan in its Management Discussion and Analysis for the year ended March 31, 2010.

DIRECTORS, EXECUTIVE OFFICERS AND AGM

Directors, Executive Officers and AGM

At the Annual General Meeting of the Company's shareholders which was held on September 15, 2009, the shareholders received the Audited Consolidated Financial Statements for the year ended March 31, 2009 and the Auditor's report thereon; fixed the number of Directors for the ensuing year at six elected Nikolas Perrault, David Johnson, J. Wayne Murton, Jorge Valente and Aurelio Useche as Directors of the Company; re-appointed the Company's Auditor, Smythe Ratcliffe, Chartered Accountants, for the ensuing year and authorized the Directors to fix the remuneration to be paid to the Auditor and re-approved the Company's 2007 Stock Option Plan.

Advisory Board

The Company formed an Advisory Board which has the function of providing opinions and recommendations for the Company's consideration. On February 8, 2008 Mr. Jean Depatie accepted the Company's proposal and joined Colt's newly formed Advisory Board. In addition to reimbursing Mr. Depatie for travel and out-of-pocket expenses, the Company has granted Mr. Depatie 250,000 stock options exercisable at \$0.25 per share for a period of 5 years. Subsequently, the Board of Directors appointed Mr. Kevin Ernst on April 9, 2009 and Mr. John D. Redfern on May 28, 2009. Both Mr. Ernst and Mr. Redfern were granted 100,000 stock options exercisable at \$0.25 per common shares with a term of five years. On February 1 2010 the company appointed Mr. Declan Costelloe to the advisory board and was granted 600,000 stock options exercisable at \$0.25 for 5 years.

Other Material Events and Highlights

On May 21, 2009 the company listed its common shares on the Open Market Segment of the Frankfurt Stock Exchange.

On May 25, 2009 the Company appointed Investel, a Berlin based Investment Relations firm to provide marketing support and increased investor visibility in Europe. The Company has agreed to pay Investel 1,000 Euros per month commencing May 25, 2009. Either party may terminate the contract upon one month's written notice. Additionally, the Company has granted to Investel incentive share purchase options to purchase a total of 200,000 common shares at an exercise price of \$0.25 per share with a term of two years.

The Company is presently not a party to any proceedings.

TRENDS

Although the markets have begun recovering from the worldwide adverse market conditions of 2009, management expects to meet its funding requirements for the year.

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements.

RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

The company adopted the amendments to CICA Section 3862 for these annual financial statements. The amendments require the use of a fair value hierarchy in order to classify the fair value disclosures related to the company's financial assets and financial liabilities that are recognized in the balance sheet at fair value.

The fair value hierarchy has the following levels:

- Level 1: Quoted market prices in active markets for identical assets and liabilities
- Level 2: Inputs other than quoted market prices included in level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- Level 3: Unobservable inputs such as inputs for the assets or liability that are not based on observable market data.

The fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

(a) Financial instruments

The carrying values of cash, short term investments sundry receivable, accounts payable and accrued liabilities, accounts payable and exploration expenses and loan payable approximate their fair values due to the relative short periods to maturity of these instruments.

The carrying values of financial assets by category at March 31, 2010 are as follows:

| Financial Assets | Held-for-trading | Loans and receivables | Held to Maturity |
|---------------------------|------------------|-----------------------|------------------|
| Cash and cash equivalents | \$ 484,445 | \$ | |
| Performance bonds | | | 123,300 |
| | \$ 484,445 | \$ | 123,300 |

The carrying values of financial liabilities by category at March 31, 2010 are as follows:

| | |
|--|------------|
| Accounts payable and accrued liabilities | \$ 414,622 |
| Amounts due to related parties | 49,670 |
| Convertible debenture | 271,038 |
| | \$ 735,330 |

(b) Fair value

The carrying values of the Company's cash and equivalents, performance bonds and accounts payable and accrued liabilities approximate their fair values because of the short-term maturity of these financial instruments. The fair value of cash and equivalents includes the balance of interest receivable. Cash and cash equivalents and performance bonds are reflected on the balance sheet at fair value using level 1 hierarchy because measurements are determined using quoted prices in active markets for identical assets.

The Company's convertible debenture is segregated into its debt and equity components at the date of issue, in accordance with the substance of the contractual agreements. The value of the conversion option makes up the equity component of the instrument and was recorded upon initial recognition using the Black-Scholes option pricing model. The debt component of the instrument was recorded at initial recognition using the residual approach and is carried at amortized cost using the effective interest method.

(c) Credit risk

The Company is exposed to credit risk with respect to cash and cash equivalents and performance bonds. The risk arises from the non-performance of counterparties of contractual financial obligations. The Company manages credit risk by maintaining cash and cash equivalents and performance bonds with major financial institutions.

At March 31, 2010, the Company's maximum exposure to credit risk is as follows:

| | 2010 | 2009 |
|--------------------------------------|------------|---------|
| Cash held in bank accounts | \$ 484,445 | 19,818 |
| Performance bonds (held in Portugal) | 123,300 | 133,600 |
| | \$ 607,745 | 153,418 |

The Company is not exposed to concentration of credit risk with respect to cash and cash equivalents or performance bonds as the amounts are held with major financial institutions in Canada and Portugal.

(d) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in obtaining funds to meet financial obligations as they fall due. The Company manages its liquidity risk by forecasting cash flows used in operations and exploration activities, anticipated from investing and financing activities, and taking into account the Company's holdings of cash and equivalents.

As at March 31, 2010, the Company has cash and cash equivalents of \$484,445 and a working capital deficiency of \$189,358 (\$263,959 for 2009). Accounts payable and accrued liabilities have contractual maturities of 30 days or less and are subject to normal trade terms, amounts due to related parties are due on demand and convertible debenture is due at maturity on June 28, 2010. The Company will require additional equity financing to meet its existing obligations as well as administrative overhead

costs and planned exploration activities on its mineral property interests in fiscal 2011. While the Company has been successful in raising debt and equity funds in the past, there exists uncertainty whether it will be able to raise sufficient funds in the future.

(e) Market risk

Market risk is the risk that fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of three types of risk: interest rate risk, foreign currency risk and other price risk.

(i) Interest rate risk

The Company's cash and equivalents generally consist of cash held in bank accounts and term deposits that earn interest at variable interest rates. Future cash flows from interest income on cash and cash equivalents will be affected by interest rate fluctuations. In the past, the company has managed interest rate risk by purchasing highly liquid, short-term investments from major financial institutions. At March 31, 2010, cash and cash equivalents consisted entirely of cash held in bank accounts; therefore, fluctuations in market rates do not have a material impact on estimated fair values at year-end.

The convertible debenture is not subject to significant interest rate risk.

(ii) Foreign currency risk

The Company operates in Canada and Portugal. The Company is exposed to foreign currency risk to the extent that financial instruments are denominated in European Euro.

As at March 31, 2010 the Company held financial instruments denominated in European Euros consisting of €0,000 in guarantee deposits and €3,874 in cash for a total of €3,874

As at March 31, 2010 the Company used a foreign exchange rate of CDN\$1.37 for €1.00.

The Company has not entered into any foreign currency contracts to mitigate the risk. Our sensitivity analysis assumes all other variables remain constant and are based on above net exposures. A 10% appreciation or depreciation of the Euro dollar vis-à-vis the Canadian dollar would result in \$8,148 increase or decrease respectively, in net income and shareholder equity

(iii) Other price risk

Other price risk is the risk that the fair or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company is not exposed to significant other price risk.

DISCLOSURE OVER INTERNAL CONTROLS

Disclosure controls and procedures (“DC&P”) are designed to provide reasonable assurance that all relevant information is gathered and reported to senior management, including the Chief Executive Officer (“CEO”) and the Chief Financial Officer (“CFO”), on a timely basis so that appropriate decisions can be made regarding public disclosure. As at March 31 2010, the CEO and CFO have evaluated the effectiveness of the Company’s DC&P as defined in Multilateral Instrument 52-109 of the Canadian Securities Administrators and have concluded that such controls and procedures are effective and provide reasonable assurance that material information relating to the Company, was made known to them and reported as required, particularly during the period in which the annual filings were being prepared.

Upon completion of the Company’s Audit for the year ended March 31, 2010, the Auditors determined that all transactions were diligently and accurately accounted for.

INTERNAL CONTROLS OVER FINANCIAL REPORTING (“ICFR”)

Management is responsible for the design of internal controls over financial reporting within the Company in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian GAAP. Management has evaluated the design of the Company’s ICFR as of the end of the period covered by the annual filings and believes the design to be sufficient to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes. There have been no significant changes to the Company’s internal control environment during the year ended March 31, 2009 that would have materially affected the Company’s internal controls over financial reporting.

CONVERGENCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”)

In February 2008, the Canadian Accounting Standards Board (“AcSB”) announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada’s own generally accepted accounting principles. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended March 31, 2011. While the Company has begun assessing the adoption of the IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

SUBSEQUENT EVENTS

Subsequent to March 31, 2010:

- a. On March 31, 2010 the company announced its intention to proceed with (and subsequently closed) its first closing on its February 2010 Non-Brokered Private Placement totalling 4,000,000 units consisting of one share and half a warrant at 0.45\$. The total raised was \$1,000,000
- b. On April 19, 2010 the company signed an IR representation agreement with an engagement fee of \$106,840 (€79,000) to actively represent the company’s interests in European markets. The agreement also included a supporting IR service with a fee paid in advance of \$135,240 (€100,000).

- c. On April 2010 the company disclosed the change of independent auditing firm and appointed Schwartz, Levitsky, Feldman. The change was due to the relocation of the head offices from Vancouver to Montreal in January of 2010.
- d. During the month of May 2010, shareholders exercised a total of 408,000 warrants at \$0.15 and 300,000 stock options at \$0.25 resulting in 708,000 common shares issued.
- e. On May 6, 2010 the company announced it had entered into an investor representation agreement with a consultant. The agreement requires the company to pay a monthly fee of \$5,000. The agreement can be terminated anytime with a 30-day notice.
- f. On May 25, 2010 the company announced its intention to proceed to a second closing on its February 2010 Non-Brokered Private Placement totalling 4,400,000 units consisting of one share and half a warrant at \$0.45. The total raised was \$1,100,000
- g. On June 1, 2010 the company appointed Donald Ziraldo to the Board of Directors.
