Colt Resources Middle East acquires a majority stake in three significant Chagai Hills exploration licenses formerly held by Lake Resources in Balochistan, Pakistan

NOT FOR DISTRIBUTION TO U.S. NEWS WIRE SERVICES OR DISSEMINATION IN THE UNITED STATES

Montreal, Quebec, Canada – Colt Resources Inc. (“**Colt**” or the “**Company**”) (TSXV: GTP) (FRA: P01) (OTC Pink: COLTF) is pleased to announce that its associate company, Colt Resources Middle East (“**CRME**”) has entered into a Shareholders Agreement further to the signature of an exclusivity agreement in May 2014 (the “JV Agreement”) with Lake Resources N.L. (“**Lake**”) an Australian based global mineral exploration company trading on the Australian Stock Exchange. This JV Agreement sets out the terms and conditions governing the joint venture Pakistani company called Chagai Resources which CRME and Lake Resources have created. Chagai Resources has now been officially awarded the three licenses formerly held by Lake Resources and will develop these license areas located in the Chagai Hills region in Balochistan, Pakistan.

These licenses cover three primary exploration areas, as indicated in the accompanying map below in Chagai Hills, Balochistan, Pakistan an area well known for world class assets such as the Reko Diq deposit. The three Chagai Resources licenses are at Amalaf, Dasht-i-Gauran and Koh-i-Sultan. The Amalaf area adjoins the northern boundary of the Saindak copper-gold mine that has been operating for over 20 years. The exploration target is large tonnage: low grade copper amenable to low-cost open-pit mining and trucking to the adjacent Saindak mine and

e Chinese entity. The Dasht-i-Gauran area is situated to the west of copper mineralisation reported by Tethyan Copper Company from drilling at its Sor Baroot Prospect at the Reko Diq Project and covers a number of possible alteration zones identified from interpretation of satellite images. At Koh-i-Sultan, CRME will be exploring for gold and copper associated with an extensive system of intensely altered breccia and volcanics covering an area of more than five square kilometres on the margin of an extinct volcanic caldera.

CRME is very pleased to take these next and very important steps towards the further exploration and development of these significant properties. CRME has been selected for the award of the first new major exploration licenses issued in over a decade by the Government of Balochistan. CRME is looking forward to working constructively with the Government of Balochistan in the coming years to bring economic and social development to the region.

Shahal Khan Chairman of CRME stated: "By signing this agreement and securing these licenses Colt is demonstrating its commitment to investing in the natural resources of Balochistan in a fair and equitable way that could ensure significant economic and social development for its people".

Richard Quesnel, President and CEO of CRME stated: "By partnering with Lake Resources, the local community and the Government of Balochistan, we believe that we can become an engine that could potentially develop what could be a world class asset in the Chagai Hills copper/gold district".

Nikolas Perrault, President and CEO of Colt stated: "We are very pleased that our efforts which began nearly 2 years ago to secure a foothold in this prolific mining district are beginning to bear fruit. We will be monitoring developments at CRME very closely with the intention of increasing our exposure as the opportunity arises."

CRME is focused on securing and developing World Class mining opportunities in the Greater Middle East and South Asia Regions.
